>Hi All, I use to open the Pst file every week, i don't know why something just happen. I got this message "The file has been modified since you last opened it. Do you want to repair the file with the current version?".. --> And then i click Yes, it will go to the first step. in Step2, it will ask me to sign in, which i Sign in to the account, and click Ok, the have change the logo at bottom in Step3, it will report this message: "Unable to load location from "" location not supported". what should i do? I have open the file directly thru disk (PDS) or directly thru my mailbox, but it still give me this message. I am using Outlook 2003 with PDS 2.1 If there is a way to stop sign-in like (copy pst to temp folder) and repair by other way, can i try this? --> ->please help me to get solution to this... >Hi All, >I use to open the Pst file every week, i don't know why something just happen. >I got this message "The file has been modified since you last opened it.
